Skills

I am quite skilled in creating websites using HTML, CSS, JavaScript, PHP, and Python. Additionally, I have proven to be incredibly adaptable by picking up new programming languages quickly.

Portfolio

HUB Global Awards Website (2023)

HUB Global Awards website (<https://hug-awards.org>), built with CodeIgniter (PHP Framework), functions as a powerful platform that highlights the outstanding contributions made by people and organisations in the fields of humanitarian aid and social impact, fostering more cooperation and advancement in these crucial fields.

Gas Sales Management Application (2023)

A Laravel application to help sales of gas by calculating price by quantity (number of kilograms) and calculating quantity by price (#). Keyboard shortcuts was implemented to enable easy sales and switch between price mode and quantity mode. Receipts also generated after each successful sale.

Bike Management Application (2023)

Bicycle application, built with CodeIgniter to assist businesses in keeping track of their bike riders and daily tickets, as well as tracking expenses and producing reports.

E-Voting Application (2023)

An electronic voting application, built with Laravel. It is specialized for student elections like SUG, Faculty and Departmental elections but can be applied anywhere. Allows setting up of different elections, posts and participants. Shows charts of results after election. This project is still in progress

CBT Application (2023)

Biometric (face authentication) based CBT Application. Frontend built with NextJS and backend built with Laravel. This application automatically assigns a computers to students upon successful verification and detects inactivity to prevent unresponsive computers from wasting students assigned time.

USTAM University Website (2022)

A virtual entryway for anyone interested in pursuing higher education or developing their talents through online learning is (<https://ustamuniversity.com>). It portrays Ustam University as a respected organization that provides a variety of academic options and supports students' desires for higher education. Built with CodeIgniter.

Campus Celebrity Contest (2022)

Campus Celebrity is a contest to vote for celebrities in each Nigerian Campus. On www.campuscelebrity.com.ng, I enabled students to register and contest for positions, payments are made in order to cast vote, along with an Admin dashboard that helps to monitor and manage activities. Built with CodeIgniter.

ESTAM University Website (2022)

People interested in pursuing higher education or developing their abilities through online learning can use <https://estamuniversitysemecampusbr.com> as a virtual entry point. It portrays Ustam University as a credible organisation that supports students' educational goals while providing a wide choice of academic options. Built with CodeIgniter.

IA Olaofe Website (2021)

Using HTML, CSS, JavaScript, and PHP, I created a portfolio website for Professor I.A. Olaofe (www.iaolaofe.epizy.com). His curriculum vitae, details about his consulting programme, and information about his books are all displayed on the website.
